NPIC/P&DS-167/64
1 September 1964

MEMORANDUM FOR: Director, NPIC

SUBJECT: Ad Hoc Committee Report on Mapping and Geodesy,
dated July 1963

1. The subject report appears to be the Army, Chief of Engineers, case for their proposed advanced mapping and geodetic program (A').

2. I see no conflict with any programs we are involved in, but do agree with [] that there appears to be no really valid reason for us to take a formal stand on it, pro or con.

50X1

3. The whole intelligence community obviously stands to benefit from well planned and executed programs to improve map coverage and reliability the world over. Whether the approach in the report is the best currently is difficult to say, and would require intensive evaluation.

50X1
